## Recommendations for Playing Pre-Recorded Homilies

Each parish is receiving three pre-recorded homilies to be presented at Mass on the weekends of Sept. 11-12, 18-19, and Sept. 25-16. Each homily is in English, Spanish or Vietnamese.

The following are general recommendations about how to access the video and audio files we are providing and how to present them during Mass.

Each parish is different. Some have the ability to project a video during Mass. If your parish does not, we have provided audio files of the homilies.

Please coordinate with your AV assistant for this task. He or she will have to insert the video/audio file at the appropriate time during Mass using whatever media the parish uses. The AV assistant will likely be connecting to the PA system, projector system, or streaming system.

Each parish will have to figure out how best to present the homilies to their communities during Mass.

We recommend parishes:

- Download the video or audio files onto the device they use to present content during Mass. Parishes often use laptops.
- Parishes **should not** connect to the video/audio weblink *during Mass*. Internet connections often have problems and could affect the ability of parishes to present video or audio files.
- Conduct tests ahead of the weekends the homilies are to be presented, preferably with the presider on hand, so he knows what to expect.

## How to download the pre-recorded files

On the parish resource page:

Right-click the “Link to download video” or “Link to download audio,” select the “Save Link As...” option. From there, select the folder location on the computer for the downloaded files.

We will update the recommendations as we work through the challenges that come up, so please check back. And please contact us with your comments or questions.
